EXPERIENCE

ReadTheNews (Charlotte, NC)

2017

Full Stack Developer

- A web app that scrapes headline news stories from multiple news sites and displays links and details of each on one page
- I used Cheerio to scrape the links; MongoDB with mongoose to store/retrieve the article's information; and HTML5 and Handlebars for the front end

HabitTracker (Charlotte, NC)

2017

Full Stack Developer

- A web app to help the user either make or break habits. The user is encouraged to repeat behavior for 21 days to make a good habit or to avoid behavior for 21 days to break bad habits.
- I was on the back-end team and was responsible for creating the mongo database and storing the appropriate data per user. I also added modal to allow username and password creation.
